LifeNet of New York and the Stat Team at Westchester Medical Center: Have you wondered what became of the STAT Flight program? In July of 2004 Rocky Mountain Holdings (since purchased by Air Methods Corporation) entered into an agreement with Westchester Medical Center to comprehensively manage and administer the flight program. The program became a community based under the name LifeNet of New York (LNNY). LNNY has an affiliation agreement with Westchester Medical Center to be a component of their comprehensive transfer and transport program. The Stat Team consists of Westchester Medical Center's transfer center, the adult and pediatric/neonatal ground teams and the LifeNet of New York air transport program.
